CONTACT VXCHNGE FOR TOURS AND ADDRESS INFORMATION

A Data Center as a Service (DCaaS) provider should deliver more than just space and power. Your provider should enable you with a business platform that delivers information to make quicker and faster decisions. The platform should be customizable for your business and aligned with your organization-wide needs. **in\site** accelerates the decision-making process and drives stronger compliance and asset controls while mitigating the business risks.

According to our customers, **in\site** has been a differentiator for business agility as a business intelligence platform.

“You have perfected showing necessary information in a brilliant UX and UI front-end”

Actual customer quote: Dun & Bradstreet

in\site offers analytics, visibility and actionable alerts across all v\Xchng data centers. Review your online infrastructure and interact with v\Xchng from anywhere with any device. With our new API connections – extend this platform with your existing systems to further enhance your operational efficiencies.

Business Benefits

Optimizes total cost of ownership

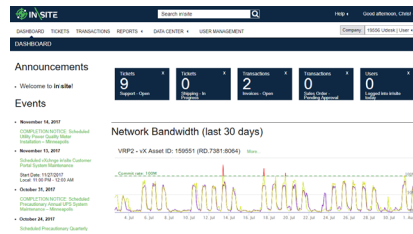

Visibility through any device anywhere

Immediate on-site response

Improves Risk and Compliance efficiencies

Enhances business decisions and visibility across organizations

HOW IN\SITE ENABLES YOUR BUSINESS

- » Greater visibility and analysis over power usage and redundancy.
- » Deployments up to cabinet level
- » Full insight with IT assets to the cabinet, rack-level assignments with one view.
- » Smarter usage of bandwidth and network usage reports with custom alerts.
- » Shorter response times for 24x7x365 on-site maintenance or support via easy ticketing.
- » Faster invoice payments.
- » Bulk upload of asset for quicker initial implementation.
- » Security Audit and compliance logs for accountability.
- » Increase accuracy and optimize capacities with full inventory on usage metrics and deployments.

“End-user clients are looking for solutions that extend beyond the traditional confines of DCIM and enable them to manage their data center operations under a single lens.”

- Gartner

In\site gives you the one central pane of glass unifying visibility of operating performance with your infrastructure services. Demo the **in\site** platform now or call 844.vXchnge to learn more.
